Dear Gary Pearse

I would like to advise that your product S-200 OilGone has been accepted for listing on the National Plan Register of Oil Spill Control Agents.

S-200 OilGone will be listed as a Bioremediation (nutrient) OSCA on the AMSA National Plan website at: http://www.amsa.gov.au/Marine_Environment_Protection/National_plan/General_Information/Dispersants_Information/Register_of_Spill_Agents.asp

We will also include in the listing links to the MSDS and ecotoxicology reports you provided as part of your application as these are the information of most significance to likely users under the National Plan.

There is also an option to provide a link to the products website. If you would like to take advantage of this option, please provide a suitable link to Paul Irving, Senior Scientific Coordinator, who I understand you have already been working with on getting this application processed.

Yours sincerely

Toby Stone
